Cough

Hard coughs are bad enough, to be sure. But it's often the little, backing, tickling, persistent cough that means the most, especially when there is a ldstory of weak lungs in the family. What should be done? Ask your doctor. He knows. Ask him about the formula on the label of every bottle of Ayer's Cherry Pectoral. Ask him if this med-icine has his full approval for throat and lung troubles. Then do as he says.

Ayer's Cherry Pectoral

sanitary commission, with reference more to the future.

'There is also the matter of the public lands, especially in connection with homesteading. The necessary amendments to the organic act were finally framed after a great deal of study, and they have been emacted by congress. It remains to apply them in a way that will work as satisfactorily and successfully as possible.

Subject of Conservation.

'Next there is the whole subject of conservation, which is closely connected with the material welfare of the territory at every point, both in connection with the main industries and homesteading, embracing the hydro-

any misunderstandings arising. The Portuguese and Spanish immigrants who arrived by the steamer Orteric are showing a tendency to be saving. They are not running up big store accounts, but are living well within their means and are putting something away. This is looked on as a very good thing. O. Brewer & Co.... \$2,200,000 \$100

Manuel A. Silva is making an inspec-tion of the immigrants on the different islands, and when he returns will pro-ceed to Gibralter and make arrangements about what can be done in con-nection with bringing over some more people. He is taking a list from those here of their friends and relatives whom they would like brought over. They are settling down well and the only one who is in Honolulu at the present time is a man whose child is rery ill.
Two or three of them who were me-

chanies have found employment with the Hilo railway and are doing well. At the Hutchinson plantation the work is being done mauka and some of them complained at the long distance they

This beach is considerably to Wainin- that the articles would cure and were award of Pearl Harbor and so far is effective in bringing about the cure of unprotected. General Murray, as chief cancer. It was alleged in the indict ment that this statement was untrue and the articles were worthless and ineffective for such purposes.

The indictment was quashed on the ground that the pure food and drugs act was restricted to prevention of misstatements about the ingredients of drugs, and did not include the provention of misstatements about the cura-tive properties of medicines. The government appealed to the Supreme Court. It was the first case to come to the

irt under the drug section of the act. In the arguments before the Sapreme ourt the government admitted that the construction it put upon the law would probably break up the patent medicine business in this country. On behalf of Doctor Johnson, it was contended that if the government's view prevailed that every physician would become a criminal if he prescribed for a patient in another State and made any suggestion as to the efficacy of his prescription. It was stated also that the biggest trust in the United States, the medical trust in the United States, the medical trust, dominated by the so-called regular physicians, would be de-lighted if the patent medicine concerns were put out of business by this case.

them on the witness stand in an endeavor to prove that filthy matter was contained in the waters from Diamond Head to the Kalihi channel at the time the board of health's swimming regulation, which Lightfoot disregarded, was in force.

Frank J. Loncke, who is a launch engineer, stated that he patrolled the restricted area for two months for the board of health, and he noticed the sewer pipe was broken ever a month ago. There were three breaks, he said. The first was twelve hundred feet out and the whole discharge was at that one break. The depth of water was about twenty feet there. Pilot Macaulay gave evidence to the

effect that the currents in the waters about Honolulu form a continuous "S." This was made up of the surface current, which included the waters of the Manoa stream, which sprends out all over the harbor; undercurrents which flew back into the harbor, and ground currents. The under currents would take up the matter that would
